

Post-doctoral Position in Structural Biology/Biophysics at the University of Québec INRS

The laboratory of Professor Steven LaPlante at the INRS – Centre Armand-Frappier Santé Biotechnologie and NMX Research and Solutions Inc. are pleased to announce the opening of a joint post-doctoral position in biophysics in Laval, Québec, Canada.

Our joint research project is centered around discovering leads for future drugs. Using a combination of disciplines in biophysics, biochemistry and chemistry, we are exploring novel fragment-based lead discovery (FBLD) strategies to target a wide variety of diseases. Please visit the Laplante Lab website (<https://www.laplante-lab.com/>) for more information.

Candidates for this postdoc position will have completed a PhD degree with experience in biophysics techniques (either NMR, SPR, and/or X-ray crystallography). Experience with protein production will be a plus. He or she must be highly motivated and willing to work in a collaborative and multidisciplinary environment that bridges academia with the pharmaceutical industry.

Applicants should submit a cover letter and CV to Professor LaPlante (steven.laplante@inrs.ca). Review of applications will begin immediately and continue until the position is filled. The successful candidate will be expected to begin as soon as possible.
